

## Workshop Revisions to LCB File R106-10

At the October workshop, there were only two revisions to the original LCB file, which were editorial in nature, correcting/updating the original R106-10.

The revisions were as follows:

1. **Section 5, Subsection 1 (Page 5):** The title of ASTM specification D5798 was officially changed since the LCB draft was written.

The title in the draft “Standard Specification for Fuel Ethanol (Ed70-Ed85) for Automotive Spark-Ignition Engines” is now “Standard Specification for Ethanol Fuel Blends for Flexible-Fuel Automotive Spark-Ignition Engines”

I have spoken with LCB and they are comfortable with this as a non substantive change.

2. The prices charged for purchase of individual specifications have changed since the LCB draft was written. They were updated at workshop as follows (and are still current as of 1/17/12):

**Section 2, Subsection 1 (Page 2):** Price for D975 is now \$57.

**Section 3, Subsection 1 (Page 3):** Price for D6751 is now \$40.

**Section 3, Subsection 1 (Page 3):** Price for D7467 is now \$46.

The sentence “ASTM D6751 and D7467 may be purchased for the price of \$45 each...” will be resubmitted as “ASTM D6751 may be purchased for the price of \$40, D7467 may be purchased for the price of \$46...”

**Section 3, Subsection 1 (Page 3):** Price for D975 is now \$57.

**Section 4, Subsection 2 (Page 5):** Price for D5797 is now \$46.

**Section 5, Subsection 2 (Page 5):** Price for D5798 is now \$40.

**Section 6, Subsection 1 (Page 6):** Price for D2650 is now \$40.

**Section 8, Subsection 1 (Page 8):** Price for D2650 is now \$57.
